SUMMARY

Data Science and Computer Science graduate with experience in data visualization, database querying, and full-stack web development. Adept at transforming raw data into actionable insights through analytical tools and programming. Seeking an entry-level Data Analyst or Data Science role to apply a strong academic foundation and technical skill set in a professional setting.

EDUCATION

Bellevue University, M.S. in Data Science Dec 2024 – May 2026

Maintained a cumulative GPA of 3.83

Wichita State University, B.S. in Computer Science Aug 2020 – May 2023

Maintained a cumulative GPA of 3.75 | Minor in Mathematics | Magna Cum Laude Honors

TECHNICAL SKILLS

Languages: Python, SQL, JavaScript, HTML, CSS, C++, C#

Tools & Technologies: Tableau, MySQL, JupyterLab, Git / GitHub, Visual Studio Code

PROJECTS

CNC AI Assistant | Python, OpenAI Fine-Tuning, GPT-4o Mini, Streamlit, Fanuc G-code 2026

- Fine-tuned GPT-4o Mini on 56 synthetic Fanuc G-code examples to build a domain-specific CNC assistant
- Built three task categories: G-code explanation, unsafe-pattern detection and correction, and manufacturing data analysis
- Generated and manually reviewed JSONL training data; trained on 75,837 tokens to enforce a consistent technical register
- Deployed an interactive Streamlit web application with separate tabs and tailored system prompts per task
- Implemented secure API key handling and token-level response streaming for a responsive user experience

Predictive Maintenance | Python, Scikit-learn, XGBoost, Pandas 2026

- Developed a machine learning model to predict rare machine failures (~0.08% failure rate) using sensor data
- Engineered temporal features including lag variables and rolling averages to capture failure patterns over time
- Addressed extreme class imbalance using class weighting and XGBoost's `scale_pos_weight` parameter
- Improved failure detection by tuning decision threshold (0.01), increasing recall to ~24%
- Evaluated models using PR-AUC and ROC-AUC, identifying XGBoost as the best-performing model

WORK EXPERIENCE

Target — Wichita, KS

Inbound Expert

Aug 2023 – Feb 2026

- Managed high-volume inventory intake and routing, ensuring accurate and efficient product flow across departments
- Maintained consistent stocking operations to support product availability and minimize inventory discrepancies
- Organized merchandise and sales floor layout to improve accessibility and overall customer experience

Groves Retail Liquor — Wichita, KS

Sales Clerk

Oct 2020 – May 2023

- Provided customer support by assisting with product selection and delivering efficient service in a fast-paced environment
- Maintained inventory organization and shelf stock levels to ensure product availability and store cleanliness
- Supported daily operations and trained new employees on store procedures and workflow expectations
